

IBS-Special Pump

Description

The unique pump system of the IBS-Special Pump is the core of all IBS-Parts Cleaning Devices. Especially developed for use in Parts Cleaning Devices, the self-priming and energy saving IBS-Special Pump, 25 watt, operates trouble- and maintenance-free.

Article-No.

IBS-Special Pump with foot switch

Function

An intake cone arranged in the lower part of the pump tube, being driven by the pump shaft, forwards a sufficient amount of IBS-Special Cleaner through the pump tube upwards.

Advantage

- transmission from the motor to the pump shaft by means of magnetic clutch
- optimal adjustment to IBS-Parts Cleaning Devices
- low pressure – no squirting and spraying
- no wearout – absolutely maintenance-free
- optional with electric motor or compressed air motor

Technical Data

Length (suction tube)	226 mm (IBS-Pump Type M/F/BK-50/G-50) 425 mm (IBS-Pump Type K)
-----------------------	---

Drive:

Revs per minute	about 2500 u/min
Pump capacity	about 3 l/min
Discharge height	1,2 m
Input power motor	25 W
Voltage	230 V/50 Hz
