WARNING!

In Agrovolt generator sets, transmission fluid of the SAE.90EP class is used. Use of a different oil will result in loss of rights under the warranty.

WARRANTY TERMS

FOGO generator sets from the AGROVOLT series are covered with a 24-month warranty. The warranty period starts on the date of the sale or, if the warranty card is missing, from the date of issue of the warranty card. The warranty does not cover defects resulting from improper use of the equipment (covers defective materials and workmanship).

Please read the user's instruction carefully.

If you find a defect, please bring the generator with a properly filled out warranty card to the point of sale where the piece of equipment was purchased.

The warranty does not cover elements that are subject to normal wear.

The warranty does not cover the volt meter, if it becomes defective as a result of excessively high rotational speed of the drive shaft.

I declare that I have become familiar with the terms of the warranty and the user's instruction.

The purchased piece of equipment is in a good technical condition and I have been informed about the need to fill the transmission with oil prior to the first startup.

Customer's legible signature
